

AUDIO, VIDEO, LIGHTING, ACOUSTICS, DESIGN, INSTALL, SERVICE, TRAINING

## COMMUNICATION BEYOND EXPECTATION

At Artech Communications we know and believe in the importance of creating an effective gospel message. Our team of designers, project management experts, and installation technicians has decades of collective experience in audio, video, lighting, broadcast, acoustics, and much more.

Noise challenges? Lighting issues? Acoustic problems? Integration complexities? Blending to aesthetics? Compability with 'heritage' equipment? Our team has encountered and creatively solved many specialized installation challenges.

Additionally, we have created special programs to assist churches and ministries to communicate with excellence yet cost-effectiveness:

- An equipment trade-in program (subject to evaluation of the condition and age of the items being traded)
- Training programs at various levels of expertise for technical volunteers both onsite and at our training facility
- Emergency back-up support or rental support when your equipment is being serviced
- Service and maintenance agreements for annual cleanings or check-ups
- Computer simulated designs to ensure the systems are selected with greater efficiency
- Phased projects approaches
- Rental discount programs for special events
- Volume discounts on some equipment and supplies

Contact us today to discuss how we can work together to enable you to communicate the Good News more effectively and efficiently. We would truly appreciate the opportunity to serve you.

We are an authorized dealer for many quality brands including:
